Change feedback

Instructions for the developer, grouped by module.

QuantSFC 7 items across 5 modules 10 Oct 2026

SUMMARY

#	Module	Change
C1	F&O EOD Data	Replace LTP / CMP with Close
C2	F&O EOD Data	CSV download: file name
C3	Home (landing page)	Landing page: pending client decision
C4	Home (dashboard)	NIFTY card: advancing / declining stocks
C5	Options Chain	“Range” column based on OI concentration
C6	Options Chain	OI charts: stack, enlarge, mark the ATM strike
C7	Payoff Simulator	Tint the inactive “Table” tab

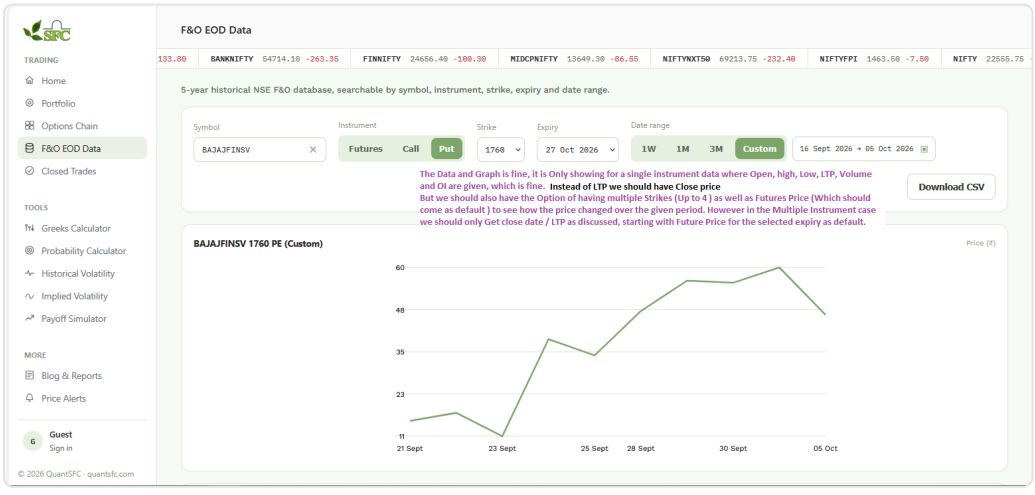

F&O EOD DATA

C1 Replace LTP / CMP with Close

F&O EOD Data

INSTRUCTIONS

- Rename the “LTP” column to “Close” and show the day’s Close price (EOD BhavCopy).
- Apply this wherever LTP / CMP appears on the page: table, chart, tooltips and CSV.
- No other change. Open, High, Low, Volume, OI and the graph stay as they are.

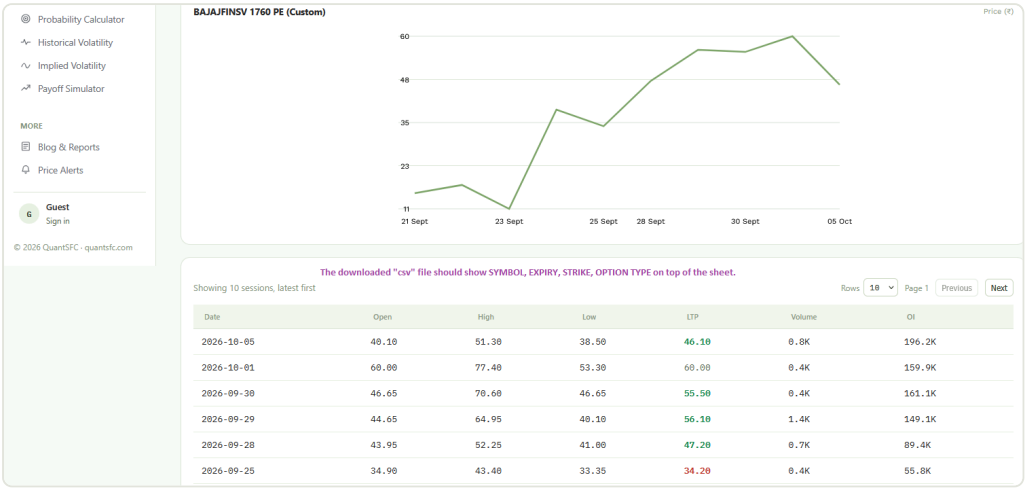

C2 CSV download: file name

F&O EOD Data

INSTRUCTIONS

- Name the downloaded CSV file with SYMBOL, EXPIRY, STRIKE and OPTION TYPE of the selected instrument.
- Example: NIFTY_2026-10-13_22600_CE.csv

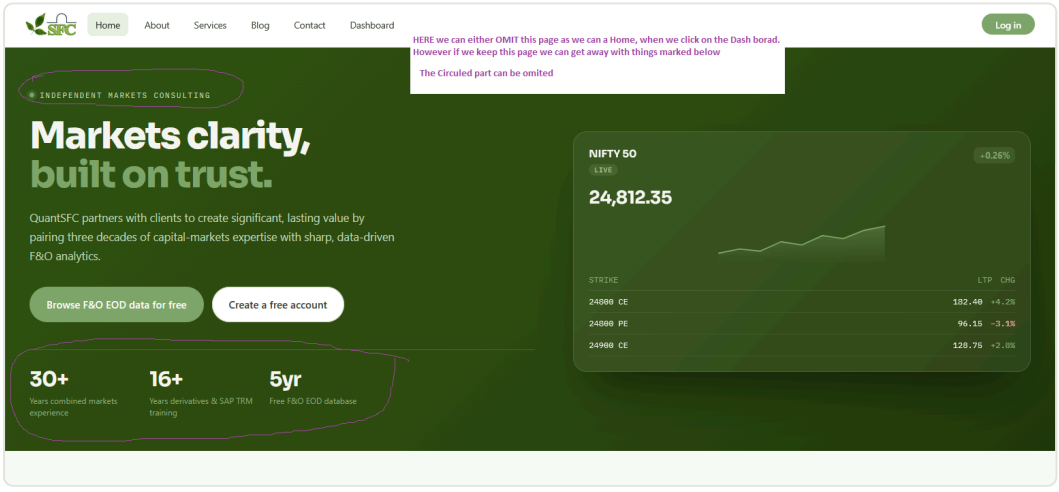

HOME (LANDING PAGE)

C3 Landing page: pending client decision PENDING CLIENT DECISION

Home (landing page)

INSTRUCTIONS

- Do not remove the page yet. The client has to confirm whether it is omitted (Home already opens from Dashboard) or kept.
- If it is kept, remove the “INDEPENDENT MARKETS CONSULTING” tag and the stats strip (30+ years combined markets experience, 16+ years derivatives & SAP TRM training, 5yr free F&O EOD database).

HOME (DASHBOARD)

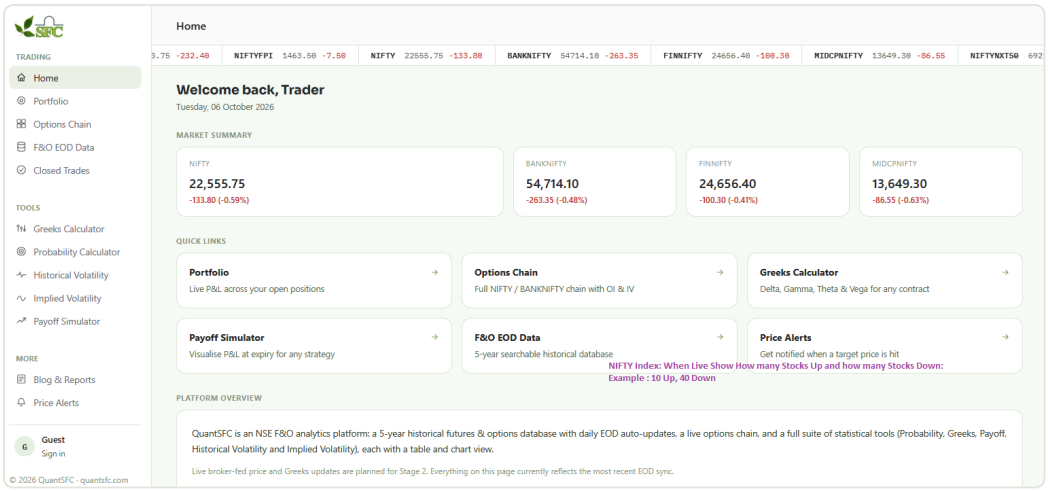

C4 NIFTY card: advancing / declining stocks

OUT OF SCOPE · DO NOT BUILD

Home (dashboard)

INSTRUCTIONS

- Out of scope. Do not build; to be discussed with the client.
- Requested for later: when live, the NIFTY card shows how many stocks are up and down (e.g. 10 Up, 40 Down).

OPTIONS CHAIN

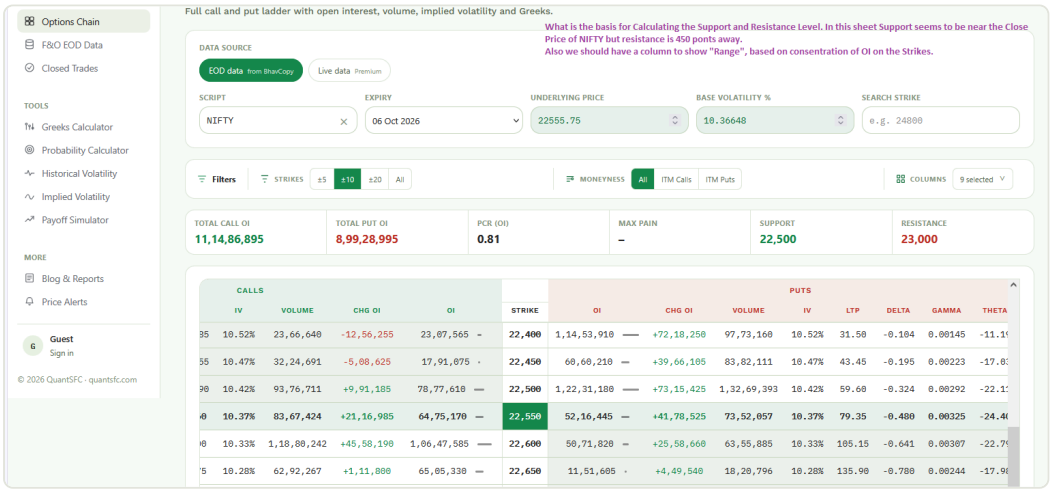

C5 “Range” column based on OI concentration

OUT OF SCOPE · DO NOT BUILD

Options Chain

INSTRUCTIONS

- Out of scope. Do not build; to be discussed with the client.
- Requested for later: a “Range” column based on the concentration of OI across strikes.

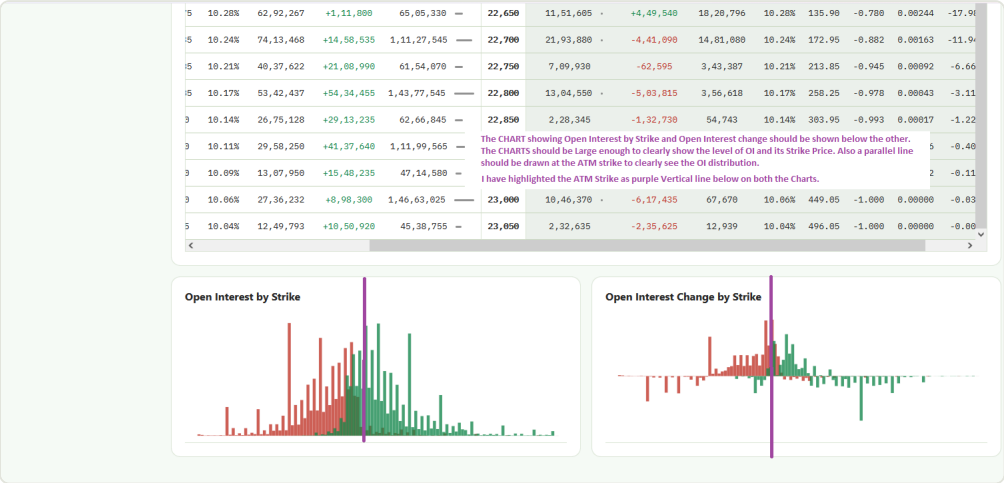

C6 OI charts: stack, enlarge, mark the ATM strike

Options Chain

INSTRUCTIONS

- Stack “Open Interest by Strike” and “Open Interest Change by Strike” vertically, one below the other.
- Enlarge both charts so the OI level and strike price are clearly readable.
- Draw a vertical line at the ATM strike on both charts.

PAYOFF SIMULATOR

C7 Tint the inactive “Table” tab

Payoff Simulator

INSTRUCTIONS

- Give the inactive “Table” tab a light colour tint instead of plain white, so it stands out as a clickable tab.
